Google Workspace & Microsoft 365 Official Partner

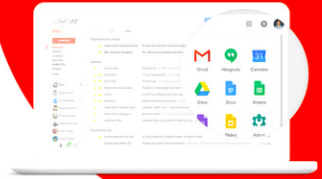

An IT company that provides cloud, web, and mobile applications development solutions to transform your business.

We are a local partner for
Google Workspace (G Suite)
and Microsoft 365 (Office 365).

Google Workspace (G Suite) in Ghana

Google Workspace (Formerly G Suite) is an all-in-one suite of web applications that assists your team to collaborate better and generate business productivity.

Google Workspace offers numerous features and functionalities such as Gmail, Docs, App Maker, Google Meet, Cloud Search, and lots more. As a Google Cloud Partner, we offer Google Workspace deployment management services, data migration, mobile device integration, change management solutions, and a lot more that can help you to fulfil your unique business needs.

Google Workspace provides a cost-effective and user-friendly set of tools that can help your team to collaborate easily. Google Workspace helps businesses to boost their overall productivity and value significantly with its highly collaborative and seamless tools. It can help you lower the maintenance and IT costs, irrespective of the size and type of your business.

Boosting Apps from Google Workspace

Gmail

Enjoy clutter-free email that does away with spam and offers a clean, ad-free interface. Build customer trust by giving everyone in your company a professional email address at your domain, like kofi@yourcompany. Also create group mailing lists, like sales@yourcompany.

Google Calendar

Spend less time planning and more time doing with shareable calendars that integrate seamlessly with Gmail, Drive, Contacts, Sites and Hangouts so you always know what's next. Share calendars with your team to stay on-track, synchronise and access meetings no matter where you work.

Boosting Apps from Google Workspace *cont'd*

Google Meet

Google Meet help your team stay securely connected with enterprise-grade video conferencing built on Google's robust and secure global infrastructure. Meet takes the headaches out of joining a video call at work or at home. Just set up a meeting and share a link.

Google Forms

Create useful, data-filled forms and surveys. Simplify the process of giving out survey forms to fill out and tabulating the results. You can record the responses and glance at the analytics in Google Sheets. Select from multiple question types, drag-and-drop to reorder questions and customize values as easily.

Google Slides

No more "bored" members with this presentation-polisher. Comment, create and give the polish you want on your slides as a team. Various permission controls allow your members to develop and collaborate on presentations online anytime anywhere.

Google Drive

Remove project delays and mix-ups. Drive does away with the need for long email threads and sharing multiple versions of documents. Give your team the ability to instantly access and share text documents, spreadsheets and other important items. Collaborate and track edits in real-time, all in one place.

Google Docs

With Google Docs you can work on text documents in real-time. This allows team members and outside parties (like clients) to comment, chat, and edit documents simultaneously. Members of your team can see edits as others make them, then communicate and collaborate via built-in chat and comment features.

Google Sheets

This app puts sophisticated spreadsheets right at your fingertips. Apply complex formulas and functions for advanced calculations, add charts, and more. Crunching company numbers never looked this good or felt this cutting-edge before.

Benefits of Google Workspace

Data Protection

A user can store, access, manage, and share data files safely with Google Workspace. It safeguards your business data from getting lost.

Easy Sharing

You can easily share Google documents or data files with anyone. You can also restrict another person's accessibility by enabling view-only access.

Unlimited Storage

Based on the package it can provide unlimited storage for your applications, data, files, docs, media, etc. This will help a user to store everything they need.

Economical Platform

The suite plans are economical and with a subscription, users can use features such as eDiscovery capabilities, unlimited data storage, etc. Pay as you need.

Custom Domain Email ID

With Google Workspace (GSuite), instead of using name@gmail.com, a user will be able to use a custom email address at a domain (name@yourcompany.com).

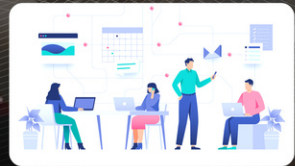

CRM Integrations

Google Workspace is compatible with several CRM solutions. This enables seamless communication and reporting to track leads, prospects, etc.

Google Workspace for education

G Suite for Education is now Google Workspace for Education Fundamentals — a free suite of easy-to-use tools that provide a flexible and secure foundation for learning, collaboration, and communication. In addition to the apps in Google Workspace for business, Google Workspace for Education Fundamentals has lots of educational products for schools such as Google Classroom.

Features of Google Workspace for Education

- Smarter Spreadsheets
- Smarter Documents
- Smarter Presentations
- Smarter Scheduling

Microsoft 365 (Office 365) in Ghana

Microsoft 365

Microsoft 365 (Formally Office 365) has been the standard suite for creating business productivity. It provides cloud computing solutions that make the business functionalities remotely accessible and collaborative in real-time. It includes premium applications like Word, Excel, OneNote, Powerpoint, Outlook and lots more.

Hapaweb Solutions is an authorized Ghana-based Microsoft 365 partner that has helped businesses and SMEs to experience a new level of team collaboration in real-time via Microsoft's online modern communication tools such as SharePoint Online, Skype for Business, OneDrive, Yammer and many more. We can help you shift your business E-mail hosting to Microsoft 365 that protects your valuable data under Microsoft Cloud Services.

Boosting Apps from Microsoft 365

Microsoft Outlook

Send, receive, and manage your email. Use Outlook's built-in calendar to keep track of appointments and events. Microsoft Outlook provides everything you need to be your most productive and connected self—at home, on the go, and everywhere in between.

Microsoft Excel

Easily create spreadsheets from templates or on your own and use modern formulas to perform calculations. New charts and graphs help you present your data in compelling ways, with formatting, sparklines, and tables to better understand your data.

Boosting Apps from Microsoft 365

Microsoft Powerpoint

Create well-designed, impactful slides with the help of Designer and Ideas in PowerPoint. With Microsoft Powerpoint you can easily insert 3D objects and embedded animations directly into PowerPoint decks from your own files or a library of content.

Microsoft Teams

Whether it's chat, calls, or video, anyone can engage at any time, bringing everyone closer. Your docs, photos, videos, chat history, and meeting notes are always there, so it's easier to work together. Set up your team's space with all the apps you need so you can stay in just one place instead of jumping around.

Microsoft Sharepoint

Empower teamwork with dynamic and productive team sites for every project team, department, and division. Share files, data, news, and resources. Customize your site to streamline your team's work. Collaborate effortlessly and securely with team members.

Microsoft Word

Need to publish a newsletter or document for others to see? Easily transform your Word document into a webpage. Collaborate with others across the globe. Translate documents in your non-native language with just a click. Get creative by inserting 3D models directly into any document.

Microsoft One Drive

Enjoy the freedom to access, edit, and share your files on all your devices. If you lose your device, you won't lose your files and photos when they're saved in OneDrive. Stay connected, share your documents and photos with friends and family, and collaborate in real-time with Office apps.

Microsoft Access

Access is an easy-to-use tool for creating business applications, from templates or from scratch. With its rich design tools, Access can help you create appealing and highly functional applications in a minimal time. NOTE: this is available only offline.

Benefits of Microsoft 365

Remote Accessibility

No matter where your team is located, whether in the office, home or on a trip, you can collaborate effectively with Microsoft 365 tools and apps.

Higher Productivity

Microsoft 365 suite is designed for daily works. The suite has tools that help teams to simplify operations, increase productivity and saves cost.

Seamless Integration

Any document created Offline in the Desktop office platform can be synced online. With Microsoft 365, teams one can easily share and edit the same document.

Security, a Top Priority

Microsoft 365 is a robust security platform used by millions of businesses to secure their valuable data, communication and collaboration applications.

99.9% Uptime

With guaranteed SLA and industry-leading data warehouses, you don't have to worry about downtime...and you are also able to access files offline.

Supports Any Device

Microsoft 365 applications can be used anytime and anywhere. And it does not matter whether you use a mobile device, laptop or desktop.

Websites & Web Applications

| Bespoke & Customised

We develop bespoke WordPress based websites and web applications to meet our client's requirements. All our designs and applications are mobile responsive i.e. the website adjusts to different device screen sizes.

We provide a customised user manual and train at least 2 persons at the client's organisation to manage and update the website or web application.

| We love WordPress

We are highly proficient in the design of website and web applications using WordPress – the world's number one website Content Management Software (CMS).

By developing your website or web app with WordPress, you will be able to manage and update it on your own – reducing the cost of ownership and management.

Our development timeframe is usually two weeks to two months depending on the complexity of the project requirements.

| Web Applications

PWA and AMP web applications

We integrate Progressive Web Applications (PWA) and Accelerated Mobile Pages (AMP) in our web application to significantly enhance the user experience across all device types.

With PWA, our web applications provide native mobile device functionalities while also being available for indexing and discovery by search engines. With AMP, our applications are faster than traditional websites.

Mobile Applications

| Our Mobile Apps Development Approach

All mobile applications that we develop consist of a web portal built with a WordPress CMS codebase. This is where content for the mobile app is created and managed. We also develop the framework for the mobile app using the WordPress core.

We then integrate Progressive Web Apps (PWA) technology into the web portal to provide mobile device functionalities. We use Accelerated Mobile Pages (AMP) technology to enable mobile-friendly content to load instantly.

What makes a PWA & AMP so special?

App-like

Feels like an app on any mobile device, because the app shell model separates the application functionality from application content.

Discoverable

It is identifiable as an "application" thanks to W3C manifest and service worker registration scope, allowing search engines to find it.

Progressive

PWA works for every user, regardless of browser choice because it's built with progressive enhancement as a core tenet.

Installable

Users can add apps to their home screens without an app store.

Re-engageable

Makes re-engagement easy through features like push notifications.

Fresh

Always up-to-date thanks to the service worker update process.

| What makes a PWA & AMP so special? *cont'd*

Safe

Served via HTTPS to prevent snooping and secures content in transition.

Responsive

Fits any form factor: desktop, mobile phone, tablet, or whatever is next.

Connectivity independent

Enhanced with service workers to work offline or on low-quality networks.

| Why use Hapaweb to develop your mobile application?

- We use PWA and AMP to ensure that your site converts visitors into customers regardless of which device they use.
- Our developers maintain our high standard of quality in the entire mobile app development process.
- We provide on-time delivery with estimating time before starting any project.
- Our team has the skill of providing satisfying solutions to clients ranging from simple to more complex mobile apps.
- We build attractive UI for your mobile pages and magnify the user experience.
- Our experienced UI designers build beautiful layouts and designs for your mobile application.
- We offer smooth integration of the existing website to the latest PWA.

Web Hosting

| Cpanel-base hosting

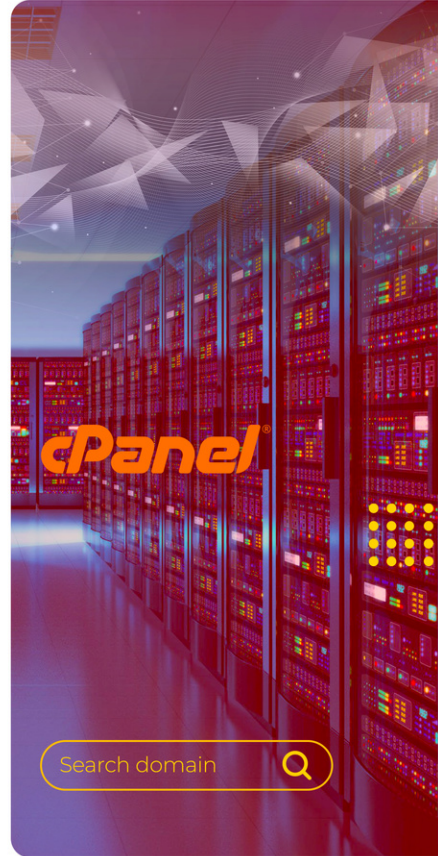

Our fully secured hosting service is crafted to perfectly host the WordPress, Drupal, Joomla or any custom CMS. The key features include:

- cPanel
- UNLIMITED Domains
- UNLIMITED Sub Domains
- UNLIMITED Email Accounts
- UNLIMITED MySQL Databases
- UNLIMITED FTP Accounts
- FREE Site Builder Software
- 4,500 Free Website Templates
- 22+ Languages Available

Domain Registration

| .com, .net, .org, .com.gh, etc.

Register your domain name (website address) with us for as low as \$25, we provide you with our own DNS control panel where you can access and control your domain's nameservers. Fill the form below and we will get back to you.

Training

| Google Workspace & Microsoft 365 Training

Our trainers are highly experienced and certified by Google & Microsoft, depending on the area of interest. Get trained and secure high profile certifications from Google & Microsoft.

We run both online and on-site trainings on the following:

- G Suite Admin Training
- G Suite User Training

About Us

History

Hapaweb Solutions is a Ghanaian Information Technology (IT) company with offices in Accra and Kumasi. The company started operations on 10 October 2010 as a pilot project in Kumasi.

In June 2012, Hapaweb Solutions was registered as a limited liability company with its head office at Asokwa Kumasi. In February 2017, the head office was moved to Spintex Road in Accra.

Area of operation

As an IT company, our focus is centred on the application of information technology both within the business, education and individual context. Our core operation within the IT industry is in the areas of Cloud, Web and Mobile applications. All our products and services are either derivatives or a combination of derivatives of these three areas.

Ideology

We are a company that puts good above profit, we do things because of the effect and impact it will have on others and not purely because of the money we can make off them. But we are not a charity organisation, we have commercial products and services to make us profitable and sustainable. Yet even with our commercial products and services we still think good before profit.

Corporate Social Responsibility

Each year we devote a substantial part of our profit after tax to the areas of EDUCATION, ENTREPRENEURSHIP and TECHNOLOGY.

From 2010 to 2015, all our CSR activities were handled by our CSR department. In 2016, we registered the Hapaweb Foundation, a Non-Profit organisation to be the main channel for all our CSR activities and engagement.
